# Sylvania leadership in lighting creates today's longest life multi-way lamp

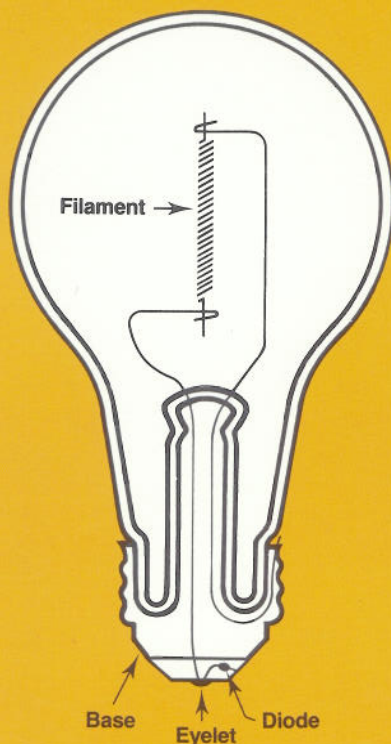

Exclusive Sylvania Hi-Lo 2-way lamps are designed to replace 3-way incandescent lamps in hotels, motels, homes and other places (most people do not use the middle setting) — and provide a lot longer lamp life. Hi-Lo's high setting is rated at 2500 hours, its low setting much longer.

It's by far today's longest life multi-way lamp!

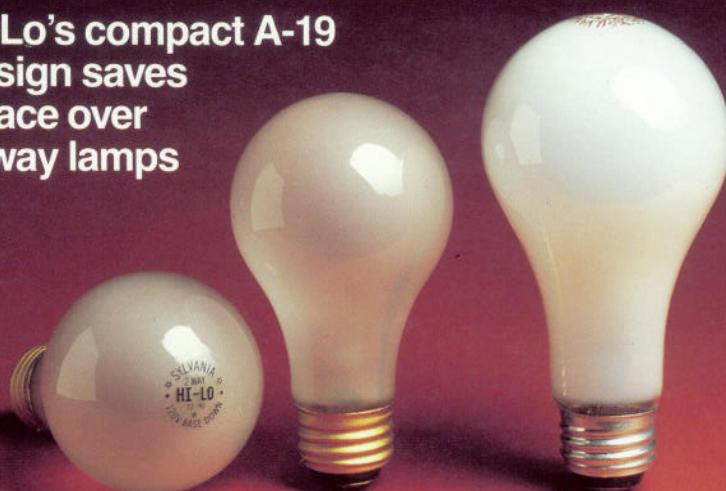

It is simple to use a 2-way lamp. Just replace 3-way lamp with the new 2-way. The 2-way lamp in the 3-way socket merely operates at the high setting on the middle and third settings.

This new lamp's advanced design — another development from Sylvania leadership in lighting technology — makes the Hi-Lo lamp much more reliable than standard 3-way lamps. What's more, krypton gas-filled Hi-Lo lamps deliver a 10% savings in lighting energy as well as increased lumens at the high setting.

**Advanced diode circuitry with a single filament gives Hi-Lo 2-way lamps far greater reliability.**

**Hi-Lo's compact A-19 design saves space over 3-way lamps**

Hi-Lo 2-Way Lamp

Standard 3-Way

**Sylvania Hi-Lo lamps have much longer life than 3-way lamps**

Lamp	Watts	Average Rated Life	Lumens
Hi-Lo 2-Way	78/135	2500 Hours	730/2300
Std. 3-Way	50/100/150	1200 Hours	640/1580/2220
Hi-Lo 2-Way	52/90	2500 Hours	370/1400
Std. 3-Way	30/70/100	1200 Hours	300/1015/1315
